

Hailing from the planet Goateborg where all creatures happen to have a goat-like behaviour and/or appearance, Milking The Goatmachine were founded in 2008 by Goatfreed and Goatleeb Udder. They came to planet Earth to spread the word of Goatgrind.

2009 the band released their first record "Back From The Goats" under the flag of Anstalt Records, which were a sublabel of Nuclear Blast.

Since 2010, together with NoiseArt Records, the band was pursuing grinding world domination and they signed a worldwide booking contract with Rock The Nation.

The goats released 6 regular albums and 1 Cover album via Noise Art Records.

In 2016 they left RTN from their own wish.

2021 was a year of some changes. MTG signed a worldwide booking deal with Stagekult and a record deal with Reaper Entertainment Europe. In 2022 the first album „Nach uns die Grindflut“ was released via Reaper and reached number 55 in the German album charts.

Mankind has always been fascinated by extraterrestrial danger, just think of "War of the Worlds", "The Body Snatchers Are Coming" or "Alien". But the real danger comes from goats from the planet GoatEborg! The inventors of the Goatgrind return to remind humanity that it is in a permanent state of subjugation. The fact that MILKING THE GOATMACHINE musically shaves the fan razor-sharp with this "convulsing concept album about nonsense" is made clear by the symbolic title "Neue Platte" and the matching cover artwork.

"Neue Platte" will be released on 18 August 2023 via Reaper Entertainment.
